Oceans of Plastic Tracey Gray 2022-06 Our oceans are amazing! They are filled with wonderful sea creatures and are essential for a healthy planet. But it's now estimated that there are more pieces of plastic in the ocean than visible stars in the Milky Way. So how can we stop plastic from our homes and cities from ending up floating in oceans far away? By becoming ocean change-makers! Oceans of Plastic explores how ocean systems and swirling currents bring plastics together into massive ocean garbage patches. It also uncovers the floating world of the 'plastisphere' – a mini community of microbes living on ocean plastics – and explains how plastic breaks up, not down, and can even end up on your dinner plate! Oceans of Plastic is packed with great ideas and simple changes that you can make to help our oceans. Become an ocean change-maker in your home, school or community, and inspire others to join you in protecting the future of our oceans. Reading level varies from child to child, but we recommend this book for ages 9 to 12.

Drawdown Paul Hawken 2017-04-18 • New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world “At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a

sense of grounded hope.” —Per Espen Stoknes, Author, *What We Think About When We Try Not To Think About Global Warming* “There's been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom.” —David Roberts, *Vox* “This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook.” —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth's warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

Happily Made Lillian Good 2017-01-17 People know me as the Monkey Ladythe woman creating jobs for marginalized mothers in Cambodia. I'm thrilled to be able to make a difference in a developing country and love to speak about my community project. It's a great story that I'm passionate about, but in order to fully appreciate it, there's another story that needs to be told first, and that is my own story weaving from Sweden to Jerusalem, onto Australia, and eventually rural Cambodia. It explains how behind the playful entrepreneur there is a wide-eyed young woman who bravely stepped into life thinking that she had all the answers. Nothing could have prepared her for what followed! My story is raw, vulnerable, and at times difficult to write. Thank you for allowing it to be shared.

Geelong's Changing Landscape David Jones 2019-11-01 Geelong's Changing Landscape offers an insightful investigation of the ecological history of the Geelong and Bellarine Peninsula region. Commencing with the penetrating perspectives of Wadawurrung Elders, chapters explore colonisation and post-World War II industrial development through to the present challenges surrounding the ongoing urbanisation of this region. Expert contributors provide thoughtful analysis of the ecological and cultural characteristics of the landscape, the impact of past actions, and options for ethical future management of the region. This book will be of value to scientists, engineers, land use planners, environmentalists and historians.

The Politics and Culture of Globalisation Hans Löfgren 2017-08-18 We experience the culture of globalisation every time we visit a Tandoori restaurant in Chicago, or a Pizza Hut in Hyderabad, or as we watch Bollywood films in Australia. Globalisation is a label used for a wide range of political, social and cultural phenomena, many of which are explored in this volume. The Politics and Culture of Globalisation: India and Australia brings together Indian and Australian experts in the fields of political science, international relations, philosophy, cultural theory and political economy. Its timeliness and unifying theme derive from comparisons between Indian and Australian perspectives, and analyses by Australian writers on developments in India. Indian-Australian relations are explored in several chapters. The neo-liberal form of globalisation is a key focus of critique in this volume. Several chapters examine the search for alternative forms of governance as the nation-state undergoes profound change due to global interconnectedness.

Florida's Great Ocean Railway Dan Gallagher 2014-10-01 The building of Henry Flagler's Florida East Coast Railway extension over water to Key West from 1905 to 1916 was a triumph of engineering and logistics. The Keys were remote and with little means of communication. The massive amounts of materials had to be moved with steam power. This book tells the story of the planners and their plan and its execution. It has 250 old photos, most of which have never been published before.

Motor Vehicles, the Environment, and the Human Condition Hans A. Baer 2019-10-09 This book explores the political ecology of motor vehicles in an era of growing social disparities and environmental crises. Humanity needs to move beyond motor vehicles as much as possible as part and parcel of the larger process of radical social structural changes.

Regenerative-Adaptive Design for Sustainable Development Phillip B. Roös 2020-09-15 In this book, the author tests a regenerative-adaptive pattern language theory towards investigating the possibilities of a holistic, integrated design and planning method for sustainable development that incorporates the principles of regenerative design, as well as an adaptive pattern language that re-establishes our wholeness with nature, and considers the vulnerabilities of a changing landscape. The book examines an integral approach to contemporary theories of planning and design that explores the human-nature relationship patterns in social and spatial interconnections, between people and their natural environments. The interconnectedness of human and natural systems is used to scaffold possible solutions to address key environmental and sustainability issues that specifically address the need for patterns of behaviour that acknowledge the duality of 'man and nature'. In 12 chapters, the book presents a holistic, regenerative-adaptive pattern language that encapsulates how communities can better appreciate landscape change under future climate effects, and acknowledges the importance to adapt to patterns of change of place and the environment and therefore inform the communities' responses for sustainable development. The application of the regenerative-adaptive pattern language was tested along the Great Ocean Road region of the Victorian coast in Australia. The concluding chapters argue that for human settlements and cities to be resilient and sustainable, we must understand the interconnected patterns of human-built environments and natural systems, and how we function in a social-spatial dimension with these. The book is intended for practitioners and academic scholars with interest in sustainable development, regenerative design, pattern languages, biophilia, settlement planning, and climate change adaptation.

Ocean Beach Storm Damage Reduction Feasibility Study, City and County of San Francisco, CA United States. Army. Corps of Engineers. San Francisco District 1996 The report presents information developed in the course of a multi-year investigation of the need for shore protection and storm damage reduction. The study area was 8.6 miles of the Pacific coast, known as Ocean Beach, in the City of San Francisco, CA. The study area extended from Cliff House to Fort Funston. The beach portion of the study area is in the Golden Gate National Recreation Area, under the jurisdiction of the National Park Service. Facilities threatened with damage included the Great Highway, parking lots of the GGNRA, a buried storm and sewer water transport box, a sewer pumping plant and ultimately houses and businesses. The report records the Ocean Engineering, Economic, and Geotechnical studies used to formulate and analyze a variety of alternative measures, including structural seawalls and revetments, as well as beach and dune nourishment. The final analysis indicated that most of the study area, while not absolutely safe, had a low probability of erosion. In the one area with a possible federal interest, the sponsor was unable to agree to cost share at the time of the report. Therefore the study was terminated. The sponsor will pursue other measures not requiring federal cost sharing.

Written in Stone Philomena Manifold 2020-09-30 A celebration of the unique coastline of the Great Ocean Road and the deep time that has shaped it. Written in Stone takes the reader from the ochre cliffs of Torquay where 25 million year old fossils can be found, past the tip of Cape Otway where Gondwanan rivers have preserved dinosaur bones and on towards the Twelve Apostles. Each location has been mapped, photographed, sketched and offered to the reader with the eye of a geologist and an artist. Through following the iconic Great Ocean Road Written in Stone shows us how to look closer and see things that we may otherwise pass by. It reveals how the colours, lines, textures and patterns we find in rocks are all here as a result of time and process acting on and shaping the landscape. This book captures the curiosity and beauty of small moments. Of objects found on walks, collected and treasured. Philomena shows us that each small piece is a puzzle to the wider workings of geology and how it shapes our lives.

Discovery Road Andy Brown 2012-08-01 The inspiring story of the first people to ride mountain bikes across the vast deserts of Australia, the dangerous bushlands of Africa, and the mountains of South America Fed up and disillusioned with corporate life, Andy persuaded Tim to leave his job and cycle around the world—convinced there could be more to life. Their goal was to become the first people to ride mountain bikes unsupported across the three southern continents and, in doing so, to raise money for the charity Intermediate Technology. This is a fast-moving tale of self-discovery, full of adventure, conflict, humor, danger, and a multitude of colorful characters. Much more than a travelogue, it proves ordinary people can chase great dreams.

Urban Planning for Disaster Recovery Alan March 2017-05-10 Urban Planning for Disaster Recovery focuses on disaster recovery from the perspective of urban planning, an underutilized tactic that can significantly reduce disaster risks. The book examines disaster risk reduction (DRR), in particular, the recovery stage of what is widely known as the disaster cycle. The theoretical underpinning of the book derives from a number of sources in urban planning and disaster management literature, and is illustrated by a series of case studies. It consists of five sections, each of which opens with a conceptual framework that is followed by a series of supporting and illustrative cases as practical examples. These examples both complement and critique the theoretical base provided, demonstrating the need to apply the concepts in location-specific ways. Examines disaster recovery from an urban planning perspective Illustrates key concepts with real-world case studies Explores the contributions of experts, urban planners, NGOs, and community members

No Adventure Too Ridiculous Rusty Hix 2017-02-15 Rusty Hix first developed a love of travel and adventure when he accompanied his family across the United States as a young boy. As he matured into a young man, Rusty began traveling internationally to feed his curiosity for understanding the world's greatest mysteries. From hiking in national parks to caving in foreign countries, Hix's fascinating stories detail unforgettable adventures in Cancun, Costa Rica, Australia, New Zealand, China, Easter Island, Finland, and many other locations. In sometimes irreverent prose, Hix chronicles his not-so-typical travel tales of helicoptering over the geothermal areas of New Zealand; zip-lining, kayaking, and whitewater rafting in Costa Rica; and visiting pagodas, Buddhist temples, and the Great Wall in China. He also describes many of the wild experiences that include a panda sitting on his lap, vertical caving, sky diving, climbing the world's highest structure, and a serious car accident that nearly cost him his life. Hix also details the food, customs and behavior of people within a variety of cultures along with vivid descriptions of the scenery where it all takes place. No Adventure Too Ridiculous is a colorful celebration of one man's escapades as he explores far-flung places on a legendary and sometimes farcical journey around the world.

Escapes & Escapades Günter Wilhelm 2017-12-04 On the occasion of a writing competition, I hoped to win a prize. So I simply wrote down my own experiences from memory as a narrative, first roughly as an eBook. I didn't win the prize, but I received FOCUS as a bonus for a year. It was also important for me to record all the names and dates once against my own forgetting. My eBook also deals with work in times of the particularly practiced and controversial globalization and its advantages and disadvantages. In the last chapter of my eBook, Anja also reports on her experiences during her participation in the BraveheartBattle 2016 in Bischofsheim/Rhön. Because of some passages and various links, the eBook is particularly suitable for people over the age of sixteen.
